

International Conference on Adhesion in Aqueous Media: From Biology to Synthetic Materials

Dresden, September 9-12, 2018

www.AAM2019.org

We welcome you all to join the ***International Conference on Adhesion in Aqueous Media: From Biology to Synthetic Materials (AAM2019)*** to be held at the *Hilton Dresden* in *Dresden, Germany*, from ***September 9 - 12, 2019***.

The main objective of AAM2019 international conference will be to provide an interdisciplinary forum for discussion on the recent developments and progress in understanding of adhesion phenomena in aqueous media inspired by natural systems. This will bring up the dialog on the questions how the knowledge on biological bonding principles and mechanisms is transferred to design of synthetic soft and multi-responsive materials with new chemistry and architectures to understand and target adhesion properties in wet environments. In addition, the aspects of testing and modelling of underwater adhesion as well as material design for biomedical and technological applications will be in focus.

At AAM2019 we will have 4 plenary, 11 invited and more than 40 contributed speakers to share their most exciting results. In addition, a poster session for roughly 100 posters and a lot of time for discussion will take place. For more details on the scope and main topics of the ***International Conference on Adhesion in Aqueous Media: From Biology to Synthetic Materials***, please refer to the website www.AAM2019.org.

Call for Abstracts started on January 15, 2019

You are invited to submit your contribution via the [electronic submission system](#) no later than ***April 01, 2019***.

Important Dates

Abstracts Submission Deadline: April 1, 2019

Notification of acceptance: May 2019

Early Registration Deadline: July 01, 2019
